

Deputy Director for Science & Technology

You had requested information on OGC's view regarding any legal impediments to FBIS' proposal for monitoring 

 Attached is a memorandum from OGC that states their position. Paragraphs 4 and 5 contain the essential statements. The OGC position presents no obstacle to our proposal. One minor bookkeeping item is required--recording instances when U.S. persons are identified, but only from the few "tributary" press transmissions that we cover.

Director, FBIS
